PROFESSIONAL SUMMARY

Motivated DevOps Engineer with strong training in Azure DevOps practices. Proficient in Linux, Git/GitHub, Docker, Kubernetes, CI/CD pipeline automation, and Terraform. Experienced with a wide range of Azure services including networking, compute, containers, and databases. Passionate about cloud-native technologies and eager to contribute as a DevOps Engineer.

TECHNICAL SKILLS

Cloud Platform	Microsoft Azure
Azure Services	VM · VNet · NSG · Azure Bastion · Storage Account · App Service · Azure SQL Database · Load Balancer · Application Gateway · Azure Container Instance (ACI) · Azure Container Registry (ACR) · Azure Kubernetes Service (AKS)
Containers & Orchestration	Docker · Kubernetes
CI/CD & Automation	Azure DevOps Pipelines
Infrastructure as Code	Terraform
Version Control	Git · GitHub
Operating System	Linux (Ubuntu/CentOS) · Windows

KEY AREAS OF LEARNING

- Linux: Command-line operations, file system management, and shell scripting basics
- Git & GitHub: Version control, branching, merging, and collaborative workflows
- Docker & Kubernetes: Containerization, orchestration, pods, deployments, and services
- CI/CD & Terraform: Pipeline automation and Infrastructure as Code on Azure

EDUCATION

Bachelor of Computer Applications (BCA) — SWIFT College, Bhilwara (Maharshi Dayanand University, Ajmer) | 2023 – 2026 | Pursuing

CERTIFICATIONS & TRAINING

Azure DevOps Course — CI/CD pipelines, Docker, Kubernetes, Terraform, and Azure cloud deployment

LANGUAGES

Hindi (Native) English
